

Databases with Standards Information

The NUS Libraries subscribe to full-text CD-ROM/DVD-ROM and online databases on standards. The stack number of an item in CD-ROM/DVD-ROM format is stated next to its name. To borrow any of the CD-ROM/DVD-ROM:

- Fill up small loan form. For those that come with keys, fill in the stack no. for the key as well
- Approach Library staff member at Loans Desk 2
- In general, for those with key:
 - use the CD-ROM/DVD-ROM borrowed (the index disk) to find the reference number for the item you want
 - use key to open cabinet to get correct image disk (arranged by reference numbers) to see full text/diagrams
- Use in InfoComm Center of Library only

1. ASTM Standards Source ZZ306

Contains the latest updated and revised edition of the full-text standards document issued by the American Society for Testing of Materials. Updated quarterly.

2. British Standards Service* ZZ322 ZZK6 (Key)

Contains the complete text of all the standard documents in all areas issued by the British Standards Institution. Updated every 60 days.

3. Construction Information Service ZZ307 ZZK7 (Key)

Contains full-text of standards, regulatory, journal articles and advisory documents for the UK construction industry. Subject coverage includes architecture, building and civil engineering. Subscription ceased in 2000.

4. European Computer & Communications Documents (CEPT/ECMA/ETSI/ITU)* ZZ324 ZZK6 (Key)

Contains the full text documents images of standards issued by the International Telecommunication Union, including both Telecom Standardization (ITU-T) and Radio Communication (ITU-R), Conference European Des Administrations Des Postes Et Des Telecommunications (CEPT), European Association for Standardizing Information and Communication Systems (ECMA), European Telecommunication Standards Institute (ETSI) and the ISO/IEC standards. Updated monthly.

5. IEEE Xplore (online)

Produced by the Institute of Electrical and Electronic Engineers, it contains the full-text publications such as conference proceedings, periodicals and standards from the Institute of Electrical and Electronics Engineers (IEEE) and the Institution of Electrical Engineers (IEE). IEEE Xplore contains publications which IEEE or IEE has the sole copyright and starts from 1988 onwards. Available online via [E-Resources, Databases](#).

6. Information Technology Standards (ISO/IEC)* ZZ324(IEC) ZZK6 (Key)

Contains the full text document images of standards issued by ISO/IEC (International Electrotechnical Commission). Updated monthly.

7. International Organization for Standardization (ISO)* ZZ323 (ISO) ZZK6 (Key)

Contains the full text document images of standards issued by the International Organization for Standardization. Updated monthly.

8. Standard Methods for Analysis and Testing of Petroleum and Related Products Z146 (2001)

This CDROM is equivalent to the printed Standard Methods for Analysis and Testing of Petroleum and Related Products. It contains over 250 Full Methods and 17 Proposed Methods, and of these Full methods, over 80 are issued as joint IP/ASTM Methods. It allows searching by abbreviated title, subject and method number. Produced by the Institute of Petroleum, London.

* Please note that these titles appear in LINC under **Worldwide specs and standards**
