Guide to browse/search databases and electronic journals in the A*STAR Digital Library (enhanced) system

1. At the A*STAR digital library homepage (http://www.lib.nus.edu.sg/astarnew), click on 'Browse/Search for Electronic Journals' as highlighted in yellow below:

How to search

Browse/Search for Electronic Journals

We are in the process of populating e-journals into this system. Please click here to view and access e-journal titles which have yet to be added to the system.

2. The list of available databases appears in a new window:

3. There are 3 ways to browse/search for electronic journals:
   a) Browse alphabetically by title of the e-journal;
   b) Browse by database and
   c) Search by title of the e-journal.

   a) Browse by title of the e-journal
Click on a letter in the alphabet list to display a list of e-journals with titles beginning with that letter e.g. Click on C to browse for Cancer Prevention Research.

b) Browse by database (if you know the database that carries the e-journal you wish to find)

- Under Available databases, click on the database name e.g. American Association for Cancer Research which carries Cancer Prevention Research.

- Browse through the alphabetical list of e-journals for the journal required.

c) Search by title of the e-journal

- Type the title of the e-journal you wish to find in the Search box e.g. Cancer Prevention Research (not case-sensitive).

- Under Filter: select Title and one of the following search criteria:
  - Matches any words (search keywords in title)
  - Matches all words (search exact title)
  - Begins with (search the first few words of the title)
• Under **Available Databases**: Select **Any** or a specific database e.g. American Association for Cancer Research (which carries *Cancer Prevention Research*).

• Results per page: 10 (by default)

• Click **Submit**.

4. To access the e-journal, click on the hyperlinked title.

5. To begin a new search, click **Start Over**.
